Richard R. Hake (4 July 2007)

I have attempted to disseminate the results of education research and to advocate e.g., more effective K-16 education, interactive-engagement pedagogy, and pre/post testing assessment, by means of frequent posts to academic discussion lists [MacIsaac (2000), Hake (2003)].

The list names, archive URL’s, and search engine URL’s (if search engines exist) of most of the lists to which I occasionally contribute are shown below. An asterisk * preceding a list name indicates use of the full (not “lite”) version of the great LISTSERV software. An “R” preceding a list name indicates that the list archives are open only to subscribers. However, subscribing usually takes only a few minutes.

To scan titles or access my posts on LISTSERV lists:

a. click on the search engine URL,
b. type “Hake” (without the quotes) into the author slot to obtain a listing of my posts, each with its Item #, date, time, number of lines, and subject heading. For example clicking on the AERA-A search engine URL <http://listserv.aera.net/scripts/wa.exe?S1=aera-a>, and typing “Hake” into the author slot yields a list of 51 posts beginning with:

<table>
<thead>
<tr>
<th>Item #</th>
<th>Date</th>
<th>Time</th>
<th>Recs</th>
<th>Subject</th>
</tr>
</thead>
<tbody>
<tr>
<td>4855</td>
<td>07/05/29</td>
<td>08:39</td>
<td>58</td>
<td>Re: The Myths of Innovation</td>
</tr>
<tr>

<tr>

<td>07/03/22</td>
<td>20:35</td>
<td>312</td>
<td>The U.S. Education Crisis: Manufactured or Real?</td>
</tr>
</tbody>
</table>

* Clicking on this number in the archive listing brings up the complete post
** This is evidently the approximate number of lines in the post

In the interest of inter- and intra-disciplinary synergy [Hake (2005a,b)], I often cross-post (i.e., send the same message to two or more lists). Therefore the total number 6680 of distributed posts shown on page 9 exceeds the number of messages that I have composed, probably by a factor of about 3.
